RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 48 pages. OCLC Number: (OCoLC)46849922 Excerpt: . . . nual Corps construction appropriation have averaged only around 1. 6 billion. The second reason for the backlog is that we are asking the Corps of Engineers to do more with less. We have a series of charts in front of you showing the breakdown by mission area for the Corps construction appropriation by representative year from the decades of the 1960s, 1970s, and 1990s. These charts are going to show that the mission of the Corps has grown substantially. If we look at Chart Three you will see that in fiscal year 1965 there were three large dominant mission areas: flood control, navigation and hydropower, with a low level of spending for recreation development. Switching to Chart four, in fiscal year 1975 you can see the big three of flood control, navigation and hydropower but with increased recreation spending. In fiscal year 1975 shore protection enters the picture and the first tiny wedge of environmental restoration work emerges. When we talk about environmental restoration work, we are talking about habitat protection, restoration of particularly wetlands and aquatic habitat. Now in Chart Five, in the 1990s we see a dramatic mission increase with environmental restoration as a significant mission area and two new mission areas of environmental infrastructure and remediation of formerly used government nuclear sites. Environmental infrastructure as contrasted with environmental restoration includes such work as construction of water plants and sewerage treatment facilities. Again, we can see we are broadening the scope of the Corps of Engineers. Now, what is the point of this Well, if you recall our second chart, the Corps construction appropriations have been fallin. . . This item ships from La Vergne,TN. Paperback.
